Why MicroHealth

PROVEN AT SCALE

Experience across civilian, defense, national security, and health missions.

MISSION BEFORE TECHNOLOGY

We start with the problem – then align the right people, process, and technology.

SMALL BUSINESS AGILITY

Direct leadership access, faster decisions, and teams built around the mission.

WE OWN THE OUTCOME

Accountability, service, and teamwork ensures we get the job done.

SDVOSB | CMMI | ISO
MULTIPLE GWAC & GSA VEHICLES

We solve hard IT problems when getting it right matters.

MicroHealth combines enterprise IT capability with the agility and access of a small business. We bring the discipline and accountability of a military service to complex technology challenges – and we measure success by the mission outcome, not the technology deployed.

Our technology solutions are suited for government, uniformed, and commercial organizations.

We're Known To

BUILD & MODERNIZE

CLOUD | SYSTEMS INTEGRATION | DEVSECOPS

Modernize systems and build solutions around the people and missions they support.

LEVERAGE DATA & AI

DATA MANAGEMENT | AI | ANALYTICS |
INTEROPERABILITY

Turn complex data into usable information and apply emerging technology to real problems.

RUN & PROTECT

INFRASTRUCTURE | CYBERSECURITY | OPERATIONS

Keep mission-critical environments secure, resilient, and performing.

DELIVER THE MISSION

AGILE PM | IV&V | QA | GOVERNANCE | STRATEGY

Bring structure, technical expertise, and accountability from strategy through sustainment.

Meet FluentasAI–

the next generation of MicroHealth's MAIKO enterprise AI platform.

Built, maintained, and supported by MicroHealth, FluentasAI brings agentic AI into the enterprise to automate work, surface insights, identify risk, and help teams make faster, data-driven decisions.
