The Secure Enterprise AI Solution

MEET MAIKO
Where Intelligence Meets Mission Security

MAIKO™

In today's digital landscape, organizations struggle to implement AI at scale. MAIKO transforms this challenge with its flexible architecture, enterprise-grade security, and no-code simplicity—revolutionizing how intelligence is harnessed enterprise-wide.

AI TAILORED FOR YOUR ENTERPRISE

MAIKO's enterprise-grade platform delivers exceptional value through several key innovations:

- **User-Friendly Design:** The platform's simple, form-based assistant and app-building capabilities are *completely configurable* to support varying user personas across your organization.

- **Provider-Agnostic Model Support:** Eliminate vendor lock-in with simultaneous *support for multiple AI models*, enabling optimal selection for specific clinical documentation needs.

- **Flexible Deployment Options:** Whether cloud-native, on-premise, hybrid, or air-gapped environments, MAIKO *adapts to your infrastructure* needs while currently operating in AWS GovCloud.

- **Knowledge Management Excellence:** Transform medical documentation into actionable clinical knowledge through *intelligent processing algorithms* that focus on medical context.

- **HIPAA-Compliant Security Framework:** Protect patient information with zero-trust architecture, comprehensive encryption, and *regulatory compliance built into the foundation*.

- **Seamless Integration:** With native connectors to various systems and a no-code/low-code approach, MAIKO *simplifies workflow integration* across your enterprise ecosystem.

- **Systematic Architectural Framework:** Built on a six-component primary system architecture (User Interface, Authentication, AI Processing, Data Access, Integration, and Security services) that works in concert to *deliver secure, reliable patient documentation* while maintaining comprehensive audit capabilities.

SUPPORT SERVICES

- **Flexible Deployment Options**
  Deploy in Cloud, GovCloud, On-Premises, or Air-Gapped environments

- **Comprehensive AI Model Integration**
  Leverage multiple AI providers (OpenAI, Anthropic, Bedrock, Azure, Google, X.ai, Self-Hosted) for optimal patient documentation

- **Healthcare-Grade Security**
  Patient data protection with DoD-Grade Guardian Firewall and multi-layered authentication

- **Training and Onboarding**
  Healthcare staff training with workflow setup, knowledge base customization, and technical support throughout implementation

- **Hallucination Reduction**
  Optimized for your Unique Assistant, App, or Agent

- **Customized Knowledge Base**
  Tailored to your Policies, Processes & Procedures

- **Visual Workflow Builder**
  Low-to-No Code, Fast Agent Building
